

Why NAKIVO for Proxmox VE

Worried about the complexity and cost of protecting Proxmox VE VMs?

NAKIVO Backup & Replication simplifies Proxmox VE protection with **agentless backup, instant granular recovery, and advanced anti-ransomware capabilities**—all in a user-friendly web interface. Start today and protect your Proxmox VE VMs with an all-in-one solution that combines enterprise-grade functionality, simple administration, and up to 50% cost savings compared to competitors.

KEY BENEFITS SUPPORTED BY DATA

FAST

2X

Faster backup with native change tracking. Instant recovery for anything. Only 2 minutes to deploy.

AFFORDABLE

49%

Lower TCO than other solutions: resource-efficient features, multiple editions and flexible licensing options.

TOP-RATED

4.8

Average rating on top IT communities for exceptional user experience, 24/7 customer support and solution functionality.

“ The solution is **4X faster**, works without errors and took just 15 minutes to set up and deploy. NAKIVO Backup & Replication provides **ease of use and peace of mind** for our business.

Cameron Rezvani,
Senior Systems Engineer,
Orange Coast Title Company

“ With NAKIVO Backup & Replication, we have saved more than 50% vs. maintenance of our previous VM backup solution, and have additionally saved 25% more in storage space costs with better deduplication, **lowering our backup expenses by 75% overall.**

Rick Braddy, Founder
and CEO/CTO of SoftNAS, Inc.

“ NAKIVO Backup & Replication **saved us about ½ of a working day a week** that was previously spent on redoing failed backup jobs. **No more failed backup jobs** for us, plus the VM backup performance improved dramatically.

Erik Voerman,
System Engineer at Traxion

COMPREHENSIVE PROTECTION FOR PROXMOX VE

AGENTLESS - SEAMLESS - ROBUST

Reliable protection

Back up Proxmox VE VMs quickly and efficiently without installing guest OS agents on each VM. Simplify the data protection process and eliminate the resource strain associated with agent-based backups. Run instant VM backup health checks to ensure clean recovery.

Fast backup

Create app-aware incremental backups of Proxmox VE VMs and VM templates. Use native change tracking to transfer only modified data, saving time and storage space. Optimize backup performance with log truncation, network acceleration and bandwidth throttling.

Multiple storage targets

Send backups and backup copies across local storage, public cloud targets (Amazon S3, Wasabi, Azure Blob, Backblaze B2), S3-compatible storage, NFS/SMB shares, tape and deduplication appliances.

Instant recovery

Boot Proxmox VE VMs from backups with a few clicks. Instantly restore specific files, folders and app objects (Microsoft Exchange Server, SQL Server, Active Directory). Power on VM replicas for quick disaster recovery.

Ransomware protection

Protect against malicious encryption and unwanted modifications by ransomware with immutable storage in local and cloud repositories, air-gapped backups on tape and other detached drives, backup encryption and more.

Robust security

Prevent unauthorized access to your data protection infrastructure with role-based access controls (RBAC) and two-factor authentication (2FA).

Quick deployment, effortless scalability

Install on NAS, Windows, Linux, or as a pre-configured VMware/Nutanix VA or AMI in minutes. Manage hundreds of Proxmox VE hosts in multiple sites with a single deployment and scale up as your infrastructure grows.

Streamlined administration

Manage data protection activities from any location with the web-based interface. Leverage features such as policy-based automation, job chaining, calendar dashboard and global search to simplify operations and save time.
